

Reliable Controls welcomes Vince Dunn as Business Development Executive for Australasia

Victoria, Canada—Reliable Controls has appointed [Vince Dunn](#) as Business Development Executive for Australasia. With nearly 4 decades of experience in the building automation and electrical industries, Vince brings a wealth of knowledge and hands-on expertise to the Reliable Controls team.

Vince began his career as an apprentice electrician in 1986, gaining comprehensive experience in mechanical electrical systems and building management solutions. His passion for training and mentoring led him to teach controls modules for electrical apprentices at the college level.

For the past 12 years Vince was business development manager at [IES Automation](#), a [Reliable Controls Authorized Dealer](#) in Canberra, Australia. His deep understanding of [Reliable Controls products](#) ideally positions him to provide dedicated support for dealers in the region.

In his new role, Vince focuses on strengthening relationships with [existing Authorized Dealers](#), [expanding the Reliable Controls network](#) in Australasia, and driving the adoption of [sustainable building automation solutions](#). His commitment to customer success aligns perfectly with the Reliable Controls mission to be the people and technology customers can rely on.

"I'm excited to join Reliable Controls in this new capacity and continue working with dealers across the region," says Vince. "I look forward to helping our partners deliver building automation that creates real value for customers."

Reliable Controls is a worldwide leader in [simple, flexible, sustainable building automation solutions](#). With a people-first approach, the company is committed to helping building owners and operators achieve their indoor environmental quality, energy efficiency, and operational goals.
